PROFESSIONAL SUMMARY

Results-oriented Software Engineer with 4+ years of hands-on experience designing and delivering high-throughput, low-latency microservices, RESTful APIs, and responsive web platforms. Proficient in TypeScript, React, Next.js, Node.js, Python, PostgreSQL, and AWS. Demonstrated track record of optimizing application performance and boosting ATS conversion rates.

WORK EXPERIENCE

Senior Full-Stack Engineer | Apex Systems | 2022 - Present
- Architected and deployed scalable payment ingestion service handling 45,000 transactions/second with 99.99% uptime.
- Reduced p99 API response latencies from 420ms to 85ms by introducing Redis caching and SQL indexing.
- Spearheaded team transition from legacy React to Next.js 14 App Router, cutting client bundle size by 38%.
- Mentored 5 junior engineers and instituted automated end-to-end testing with 88% branch coverage.

Software Engineer | CloudScale Labs | 2020 - 2022
- Developed customer-facing analytics dashboards using React, TypeScript, TailwindCSS, and D3.js.
- Integrated PostgreSQL database layer using Prisma ORM, improving complex query performance by 25%.
- Implemented OAuth2 and JWT-based authentication pipelines ensuring strict SOC-2 compliance.

EDUCATION

Bachelor of Science in Computer Science | University of California, Berkeley | 2016 - 2020
- Relevant Coursework: Data Structures, Algorithms, Distributed Systems, Database Management Systems.
- GPA: 3.82 / 4.0

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Go, SQL, HTML5, CSS3
Frameworks & Libraries: React, Next.js, Node.js, Express, TailwindCSS, Jest, Vitest
Databases & Tools: PostgreSQL, Redis, MongoDB, Docker, Kubernetes, AWS (S3, ECS, Lambda), Git, CI/CD
